

Pie filled dual axis chart

Pie marks will be helpful to show the percentage of Profit of a category by geographic location.

Profit Map by state and Statewise profit distributon by category in Pie filled chart

The gradient colour in Map view represents sum of profit by state. The states with a pink colour show negative growth while darkest green states such as California, New York shows high profit.

And the pie chart shows the profit distribution by category in that state. It helps to show a proportion of one category with respect to all categories. For example, in California the office supplies are the best profit generating category among all other categories.
